

10-YEAR
CORROSION WARRANTY

The Real Cost of Wheel Corrosion

PROTECT YOUR BUSINESS IMAGE

Your company vehicles create and strengthen awareness of your company and are a reflection of your business. Every day your vehicles drive past thousands of people who could be among your best customers, prospects, vendors and/or investors. Don't allow corroded/rusty wheels to tarnish the image of your business.

DON'T GLOSS OVER THE PROBLEM OF CORROSION

Corroded/rusty wheels are costly to refinish and require continual maintenance, which often results in vehicle downtime. End the cycle of refurbishing wheels every two to five years by purchasing A2G™ Premium Wheels.

A Wheel Industry First 10-Year Corrosion Warranty

COR SOL® CORROSION SOLUTION

Engineered Coating Services LLC (ECS) has the exclusive rights to COR SOL® corrosion solution (The Alternative to Galvanizing®) for wheel treatment. Over the past five years, ECS has developed and field tested this patent-pending process in conjunction with PRP® Industries. With thousands of successful, field-tested wheels in service, we are proud to be able to offer a 10-year corrosion warranty against corrosion undercutting and blistering.

COR SOL® corrosion solution has over 15 years of field-proven success protecting metal parts in many industries, such as the Truck and Trailer Industry, Agricultural Industry, and Gas/Oil Industry.

Customers Say It Best

PROFESSIONAL PROTECTION, PROFESSIONAL IMPRESSION

Our customers are not only enjoying great looking wheels, but they are saving time and money as well.

“Our fleet of trucks are moving billboards making their appearance an integral part of our logistics strategy. We were resurfacing and painting wheels, bumpers and fuel tanks two times per year, which increased labor costs and caused fleet downtime. With CORSOL® corrosion solution, these same truck components have been in the field for four years running with no re-treatment. It’s the only rust prevention that actually works!”

~NATIONAL FOOD RETAILER

Creating Local Jobs in America

EXPANDING WHEEL PRODUCTION

With the success of A2G™ Premium Wheels over the past year, we have doubled our production capacity in our Michigan-based facility and added 30% more local jobs. Our dedicated staff specializes in the production of A2G™ Premium Wheels treated in-house with CORSOL® corrosion solution. Wheel refacing is also available in our Michigan facility.

PATENT PENDING

Engineered Coating Services LLC (ECS) has the exclusive rights to CORSOL® corrosion solution for wheel treatment and has developed the patent-pending process in conjunction with PRP® Industries.

The smart wheel choice.

The A2G™ Standard Satin Black wheel has a classic clean look that will enhance the aesthetics of your trailer for years. This wheel surface requires low maintenance and provides high corrosion-resistant performance. In addition, we offer eight unique color-facing options. Our color facing is applied to the wheels peak wear and visible surfaces. You choose the surface that works for your truck or trailer, either the deep-dish or front-face side.

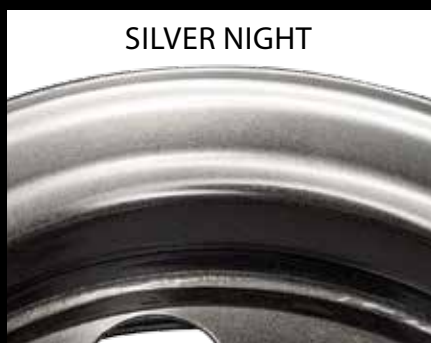

STANDARD SATIN BLACK

The Gloss Series features a high-gloss finish.

The Night Series features a unique high-gloss metallic finish, blending from light to dark.

The Premium Series features a high-gloss metallic finish.
